ADDENDUM TO INST-2001

2001 Series Cable Clips

Installation, Operating & Maintenance Instructions

Use:

Cable Clips are to be used only to secure the bottom end of a wire rope vertical lifeline. The anchor point must be secured by means of ferrules swaged by SM/RTC, or by a clamp thimble.

Instructions:

1. Turn back 6.5" or more of wire rope.
 2. Apply first clip approximately 1 3/4" from "dead" end of rope.
 3. Apply U-bolt over "dead" end of wire rope - live end rests in saddle.
 4. Tighten nuts evenly, alternate from one nut to the other until reaching 45 ft. lbs.
 5. Apply the second clip as near the loop or thimble as possible.
 6. Tighten nuts evenly, alternating until reaching 45 ft. lbs.
